SOC 4650/5650: Lecture Prep 05 - Qualitative Mapping

Christopher Prener, Ph.D.

Feburary 19th, 2018

Directions

Complete all of the steps in Chapter 2 of Gorr and Kurland (2016) between pages 48 and 53 (end at "Add points and create a definition query"). A replication video will be posted on YouTube. Your map file (`.mxd`) should be uploaded to your GitHub assignment repository in the `LecturePreps/LP-05` directory by 4:15pm on Monday, Feburary 19th, 2017.

Additions and Changes

1. On page 48, under question 2 of "Start ArcMap and open a map document", you can find the referenced file in the course data release at `DataLibrary/GISTutorial/Maps/`.

2. On page 48, under question 3 of "Start ArcMap and open a map document", save your map file (`.mxd`) to a `maps` folder you create within `LecturePreps/LP-05`.[1]

3. On page 53, at the end of the "Your Turn" box under "Label zoning features", save your map document at that point. Export an image of your map as a `.png` at 300 dots per inch to a `results/` folder you create within `LecturePreps/LP-05`. Commit your changes through GitHub.

[1] See Chapter 4.3 of *Sociospatial Data Science* for more details.
